Complex Installations?

*Who said it
couldn't be
done?*

Severtson Screen's revolutionary folded silver 3D & white screens come in any perforation type, coating or gain and can save up to 70% in shipping costs -- opening up international markets and providing logistical solutions for complex theatre installations. *"Who said it could never be done?"*

Folded 3D Screens

International Folded Screens

Severtson's folded screen technology is now used to produce theater-sized, 3D white & silver electric screens available in micro, standard and non-perforated formats -- enabling any auditorium to be transformed into multi-purpose theaters.

Cinema Electric Screens

Micro Perf screens provide up to 15% better sound transfer while significantly reduced moiré issues...optimal for high resolution video 4k and above.

Premier Cinema Quality

Severtson Screens new Price Estimator Tool available online via website and mobile devices simplifies and accelerates Cinema dealer access to pricing and dimensions screen types and freight options.

Convenience

Severtson Corp is a globally recognized name and leader providing the most innovative and highest-quality movie experiences to consumers around the world.

**From the Movie Theater to the Home Theater and Everything in Between...
Severtson has the screen for you!**

Backup Slides

“Severtson Corp was a Coating Company long before entering the Movie Screen industry”

- Severtson Screens roots stemmed in the government and military flight simulation industry in the early 1980s
- Severtson’s revolutionary coatings provided the ultimate immersive and virtual reality experience for pilots
- Ron Severtson recognized internationally as the industry leader for his work in formulating coatings of the highest quality
- Simulation leaders such as NASA, GE, Boeing, McDonnell-Douglas, Lockheed-Martin, Nordam, Spitz, Logicon, and Air Forces throughout Europe, Middle-East, Asia and Latin America implement Severtson’s innovative coatings

FACT: Severtson's highest gain coating produced was 17...used in a 1980's flight simulator with a 200 lumen projector.

SēVision 3D

Gain Range

Wide Angle
1.4 - 2.4 Gains

Standard Cinema
2.2 - 2.6 Gains

Simulation & Specialty Screens
Super Brights 2.7 - 6.0 Gains

Ask a Severtson representative which gain is right for you

Available in Severtson Non-perf, Standard-perf and Ultra-perf patterns

Higher gain screens (1.4 - 2.4) require less lamp power significantly reducing operating costs...but will also magnify screen defects

Gain Capabilities

Severtson Corp entered the cinema industry in the early 1990's after being requested for coating large cinema screens in movie theater chains throughout the world, bringing the **virtual reality experience** of simulation to the Big Screen.
